

Water Leak Detector Placement Guide

Ten locations where earlier warning can meaningfully reduce water damage.

WHERE TO PLACE SENSORS

WALK-THROUGH CHECKLIST

- ☐ Water heater checked
- ☐ Washing machine checked
- ☐ Kitchen / dishwasher checked
- ☐ Refrigerator water connection checked
- ☐ HVAC condensate area checked
- ☐ Bathrooms checked
- ☐ Basement / sump area checked
- ☐ Previous leak locations checked

MY LEAK PROTECTION PLAN

Sensor locations

Main water shutoff location

Last detector test

Next battery check

Known previous leak location(s)

A leak detector reports water that has already escaped. It does not replace inspection, maintenance, an HVAC float switch, or professional service. Never bypass a safety device.
